EXHIBIT IV.H.3.
REPORT IV.H.3: 2018-19 School Year
MEASURES TO MAKE STUDENTS AWARE OF
EXTRACURRICULAR ACTIVITIES

The District took steps to ensure that all students were aware of academic clubs and related extracurricular opportunities and that these opportunities were available to all students. The measures the District took included:

➢ **Hosted/Conducted Interest and Outreach Efforts**: Provided at the students’ home zoned school. For example, middle and high schools conducted at least 1-2 club fair days during the 2018-19 school year. At these events, each club and organization set up tables with information about each club and used sign-up sheets to recruit new members.

➢ **Rack Cards**: The District printed Rack Cards for all six high schools and middle schools that list, advertise, and highlight all clubs and organizations offered at each school. The Rack Cards are about the size of a large bookmark. This makes it easy for students to access and keep with them.

➢ **Online Club Information**: All clubs and organizations were posted on each school’s website. Additionally, printed information was sent home to parents/guardians advertising all school-sponsored clubs and extracurricular activities.

➢ **Math Club Competitions and Leagues**: The District held math competitions for elementary and middle school students during the school year.

➢ **In-School Participation Time**: Schools scheduled time during the school day to allow for equitable participation during 2018-19.
